**5. Fire-fighting measures****5.1 Extinguishing media**

- **Suitable extinguishing media**
Dry chemical, carbon dioxide, water spray or regular foam. Move containers from fire area if it can be done without risk
- **Unsuitable extinguishing media**
Do not use a solid water stream as it may scatter and spread fire.

5.2 Special hazards arising from the substance or mixture

Vapours may form explosive mixtures with air. Vapours may travel to source of ignition and flash back. Most vapours are heavier than air. They will spread along ground and collect in low or confined areas (sewers, basements, tanks). Vapour explosion hazard indoors, outdoors or in sewers. Runoff to sewer may create fire or explosion hazard.

Hazardous combustion products Carbon dioxide (CO₂), carbon monoxide (CO), nitrogen oxides (NO_x)

5.3 Advice for firefighters

Appropriate self-contained breathing apparatus and chemical protective clothing must be worn. Do not inhale explosion and combustion gases. Use water spray jet to protect personnel and to cool endangered containers. Do not allow run-off from firefighting to enter drains or water courses.

6. Accidental release measures**6.1 Personal precautions, protective equipment and emergency procedures**

Remove all sources of ignition. All equipment used when handling the product must be grounded. Do not touch or walk through spilled material. Stop leak if you can do it without risk. Water spray may reduce vapour but may not prevent ignition in closed spaces.

6.2 Environmental precautions

Prevent entry into waterways, sewers, basements or confined areas.

6.3 Methods and material for containment and cleaning up

Methods for Containment A vapour suppressing foam may be used to reduce vapours. Absorb or cover with dry earth, sand or other non-combustible material and transfer to containers. Dyke far ahead of liquid spill for later disposal.

Methods for cleaning up Use personal protective equipment as required. Soak up with inert absorbent material (e.g. sand, silica gel, acid binder, universal binder, sawdust). Dam up. Pick up and transfer to properly labelled containers. Clean contaminated surface thoroughly. Prevent product from entering drains. Take precautionary measures against static discharges..

6.4 References to other sections

See section 8 for national exposure control parameters. See Section 12 for additional Ecological Information.

7. Handling and storage**7.1 Precautions for safe handling**

Ensure adequate ventilation, especially in confined areas. Keep away from heat, sparks, flame and other sources of ignition (i.e., pilot lights, electric motors and static electricity). Take precautionary measures against static discharges. Use spark-proof tools and explosion-proof equipment. All equipment used when handling the product must be grounded. Do not breathe gas/fumes/vapour/spray. Use personal protective equipment as required. In case of gas escape or of entry into waterways, soil or drains, inform the responsible authorities.

General hygiene conditions

When using do not eat, drink or smoke. Regular cleaning of equipment, work area and clothing is recommended

7.2 Conditions for safe storage, including any incompatibilities**Storage Conditions**

Keep tightly closed in a dry and cool place. Keep in properly labelled containers. Keep away from heat, sparks, flame and other sources of ignition (i.e., pilot lights, electric motors and static electricity). Keep in an area equipped with sprinklers. Ensure adequate ventilation. Keep only in original container. Do not allow to enter into soil/subsoil. Restrict access to stockrooms.

7.3 Specific end uses**Risk Management Methods (RMM)**

The information required is contained in this Safety Data Sheet.
